

As with many electronic devices, updates for older systems are no longer possible indefinitely. We also offer to install an update on older systems with a software version lower than 2.1.xxx. Send your system to us and we will install the current updates on heatapp! base, heatapp! base T2B and heatapp! gateway. Updates via Internet are now possible again. Your installation remains unaffected. This means that no subsequent reinstallation is necessary. When you get your system back and reconnect it, all components will find themselves automatically.

You can have the update installed in our house for a flat rate of Euro 50 plus shipping costs and VAT per heatapp! system.

Make sure that the devices are properly packaged for transport. We do not accept any liability for transport damage.

Return address: **EbV Elektronikbau- und Vertriebs- GmbH**
Repair Department Plant II
Carl-Benz-Str. 40
57299 Burbach
