Customer: **EbV**

1   Release Notes heatapp! App 3.0.1 301000006 from 09/08/2024

Update available for Android and IOS, for all supported operating systems.

2   Content of the update

- Error correction:
  - The minimum temperature and maximum temperature were mixed up in the system information
  - In the English app version, "Save" and "Back" were not translated in the cycle times
  - English app line breaks in the days of the week have been removed
  - Access to the live view with IOS devices works again
  - Cycle times can be copied back to hot water
  - The monitor is fully operable again (selection of week - month and +/- possible)
  - The font size is now limited to ensure that the buttons remain operable.
  - Instead of the grey area, the system list is now displayed correctly again
  - The unintentional logout has been removed. You now remain logged in to the system.
  - Cycle times can also be copied to Sunday using devices with small displays (e.g. iPhone SE).
  - The timeout error messages have been minimised.
  - The push notifications are working again (Release Connect)

- The phone app can now also be rotated to landscape format
- The help menu is back
- The eye symbol is displayed for all password functions (change own password, change user password) so that you can view the entry.
- Legal and help are now also accessible from the settings
- If no rooms/room rights are available, the user receives a message

We hope you enjoy using your system.
