1 Release Notes heatapp! App 3.0.2 301000010 from 18.11.2024

Update available for Android and IOS, for all supported operating systems.

2 Content of the update

- Adaptation to IOS 18
- The position of the error reporting triangle has been corrected so that it no longer collides with the settings of the tablets
- Reduced number of websocket queries
- Error state after timeout of systems has been corrected
- The placeholder is displayed in the room images if no room image is available
- Under Settings, the system information has been removed as it can also be called up with the weather data.

We hope you enjoy using your system.
