- Introduction of the invitation QR code in the setup log
- Introduction of remote operation via Modbus
- Introduction of remote operation via MQTT and Homeassistant
- Setting switching times in the Expert menu until midnight
- Renovation of update certificates

3 Contents of the update for the heatapp! gateway

- Renovation of update certificates

4 Safety

It is always advisable to back up your data **before** performing an update. To do this, select "Settings > System > System management" in the app and create a backup on a USB memory stick connected to heatcon! EC/heatapp! base/heatapp! base T2B.

Note It is not possible to back up the heatapp! gateway.

Perform the updates after backing up your data. **Do not disconnect the power supply to the devices during the update.** Depending on the size of the system and the speed of the Internet connection, the updates can take up to 20 minutes and are only complete when the LED(s) light up dark green again.

5 Update path for manual call

Settings > System > System administration

We hope you enjoy using your system.
