

## heatapp! in office buildings

### heatapp! also for companies

Particularly in office buildings or doctor's surgeries, unnecessarily high heating costs are often incurred. The rooms are hardly used after 6 p.m., on weekends or during holidays, but the heating usually runs continuously.

Here heatapp! offers an enormous saving potential. With a heatapp! system up to 24 rooms with four radiators each (with wall heating) can be controlled separately.

Simply set up switching times for individual rooms or room groups in heatapp! and save energy immediately.

The system can also be controlled via the app at any time.

### Can every employee then operate the system automatically?

There are 3 different profiles (rolls) which can be created:

- **Owner:** Can control all rooms - has access to all settings, menu heatapp! base and menu heatapp! gateway - limited rights in the "Expert" area
- **Expert:** Rights like owner- Extended access to all settings in the "Expert" area (incl. heating parameters) - no right to view integrated images (data protection) / at best this is the responsible installer
- **User:** Can control rooms for which he has permission - access to settings "My profile", "Cycle times", "Design", "Live view"

You can create as many users as you want. Each user must be assigned the appropriate rights. This is done on the one hand by selecting the user role (expert / administrator / user) when creating a new user. Experts and owner have all access rights and operating options. The "User" user role has no administrative rights. Therefore, the rooms must also be assigned to the individual users. Experts or

owners select the Settings/User or Settings/Rooms and define which user is assigned operating rights for which rooms. After the room assignment, the user can see the rooms assigned to him and operate them to their full extent (including scenes, cycle times and desired temperatures).

In an office, for example, each employee can be assigned his or her own office, so that he or she can control the temperature there and only there.
