Contents: **Release Notes**
Customer: **EbV**

1   Update 2.2.42973, Relay V2.2 Rev. 52 from 23 February 2026

Update available for:

heatapp! base	heatapp! base T2B	heatapp! gateway
heatcon! EC 1351	heatcon! EC 1321	heatapp! Zentrale

2   Contents of the update

- **Bug fixing**
    - MQTT with authentication password now works
    - The password rules have been adapted to the heatapp! password rules.
    - Room names are now also displayed in Home Assistant when using the heatapp! Zentrale.
    - Even on systems with many rooms and long room names, MQTT data can now be saved without crashing.

3   Security

It is generally recommended to back up your data **before** performing an update. To do this, select "Settings > System > System Management" in the app and create a backup on a USB memory stick connected to heatcon! EC/heatapp! base/heatapp! base T2B.

Note: It is not possible to back up the heatapp! gateway.

Perform the updates after backing up your data. **Do not disconnect the power supply to the devices during the update**. Depending on the size of the system and the speed of the internet connection, the updates can take up to 20 minutes and are only complete when the LED(s) light up dark green again.

4   Update path for manual call

Settings > System > System administration

We hope you enjoy using your system.
